phone 435- 636- 5609

I am apposed to any aquifer exemption, such as has been requested by Merion Energy.

I am disgusted with the law makers and regulators that continue granting approved permit and plan modifications of the law to corporations that agree to all of the requirements of the law until they receive a approved plan ,then the plan\permit modifications begin, and they are approved, if these corporations can not operate within the law and the requirements of there approved plan, then they should be required to do the complete permit request over, including a new E.I.S. or they should not be allowed to operate in the U. S. A.

I do not believe for a New York minute that this letter will make any difference, the modification has already been approved

Kent Pilling

P.S

If you want to see some examples of some of are corporations handy work, contact me, I will take you for a tour of public and private lands that will make you more careful, when you grant permits and permit modifications, and then again it might not.

Some of the corporations take what they want of the natural resources, pollute, destroy, and sterilize other natural resources to the point that they are useless or can not be recovered. And these groups do this with are law makers and regulators approval .

I believe we all know why .
